

## Dream Theater & other Cover songs

All the combi are setted to play a part of a song and include both sounds and controller signal like pedals, SW, knobs, AT, etc. Those control are setted up for my own convenience and in relation with the sheet music I've got from some midi files (found on dreamtheater.net and other sites). So U can ask me how to use them or set up the controls for your own convenience.

In these pcg U'll find in combi mode these songs:

The Final Countdown

Erotomania

a part of Voices

Pull Me Under

Another Day

Surrounded

Wait For Sleep

The Silent Man

Overture 1928 (uh I forget the Title! Is the year the right one?)

Mirror

Who Wants To Live Forever

D127 a simulation of monster lead (kurzweil) without using MOSS board

The combi D bank use instrumets of all the prog banks so u have to load all the pcg.

Some of these combis use MOSS board sounds for the sax, the pad and the lead (I've programmed F126 & F127 sounds to simulate Monster lead of Kurzweil). Hope this will help U.

**Save all your data befor loading this pcg!**
